KLUŚ® Inspiring Solutions

PRODUCT DESCRIPTION

Patent Number: US D724,260S

ETL Intertek

Fixture Certified to NSF 2 standards
when assembled by KLUS

- Ability to create a line of light
- Easy assembly and disassembly
- Can be combined in straight and broken linear runs
- Simple design
- Designed to reach an IP65 waterproof rating

FINISH :

Silver anodized ☐

TECHNICAL SPECIFICATION

Application

- main lighting installation in existing drywall structures

Mounting

- mounted with clips in the mounting extrusion

Additional information

- minimal flange effectively masks the mounting gap
- space for LED strip: 0.95" / 24.2 mm

Extrusion bending

Minimum internal radius	Minimum external radius
3000 mm / 118.1"	3000 mm / 118.1"

- minimum radius – bending radius which when exceeded causes destruction (deformation, bending or lack of compatibility with other accessories, e.g. covers, end caps, etc.) of the extrusion,
- internal radius – refers to the extrusion bent so that the cover is facing the inside of the arch,
- external radius - refers to the extrusion bent so that the cover is facing the outside of the arch,
- irregular curves are possible after consultation and individual quotation,
- when bending anodized extrusions, one should be aware of cracking of the anode coating (which may be more or less visible depending on the radius).

Possibility of making a linear fixture with IP65 protection, which means the fixture is dustproof and waterproof in contact with water jets.
Achieving IP65 is possible with the following covers: LIGER-22, MUN-22 and HS-22.

Turn off LED lights during peak day light hours in outdoor applications to avoid excessive heat buildup which will result in diminished LED life.

AVAILABLE LENGTHS

Ref. nr.	surface finish	available lengths
B5553ANODA_1	Silver anodized	39.4''
B5553ANODA_2	Silver anodized	78.75''
